**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glover, Jr. et al (4,917,202).

Glover, Jr. et al disclose an air cleaner (26) for engines comprising a case, a cover and an air cleaner element accommodated in a space (30) defined by the case and the cover (28, 34, 36, 42, 44) wherein the air inlet (50) and an air passage are provided to the case, a fender (52) is provided on the side of the inlet (50) and the air passage, and a hollow tube (68) extending externally from the peripheral of the air inlet (50) to admit the air to enter into the air cleaner element (26) and the hollow tube (68) to deliver air shielded by the fender (52) (see col. 2, lines 19-35 and lines 61-62). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide a fender as taught by Glover, Jr. et al for the air cleaner in order to form an air deflector assembly to protect the air cleaner from foreign materials such as rain water, dirt, mud, etc. from entering the air cleaner or the engine.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Erdmannsdorfer (4,198,217) discloses a protective air filter intake hood.

Art Unit: 1724

- Yotsumoto (3,737,002) discloses a suction gas protective device in motor vehicle.
- Sexton (2,853,153) discloses a military vehicle air filter.
